Learn to solder (Kids)

\$695 per session (2 hours)

10 participants, age 10+

This kid-friendly soldering workshop teaches children the basics of electricity and electrical circuits. With instructions and help from our facilitator, they will create a light-up LED shape. Shapes are laser-cut ahead of time, and can be customised to your event. Parent/guardian must accompany any participant under 18.

Materials and equipment are provided

Learn to solder (Adults)

\$730 per session (2 hours)

10 participants

This soldering workshop teaches the basics of electrical circuits and techniques for through-hole soldering. With demonstration from our facilitator participants will get to solder and assemble a fully-functional torch, or line-following robot.

Materials and equipment are provided

3D design and printing (Kids)

\$630 per session (2 hours)

10 participants, age 8+

Bring together creativity and digital fabrication in this kid-friendly workshop. With instructions and help from our facilitator they will create their very own 3D digital design. They can then 3D print their design on the spot, or collect it at a later date. Parent/guardian must accompany any participant under 18.

Materials are provided. Projector/screen are required

Parent/guardian help is encouraged for any participants under 18

PUBLIC WORKSHOPS

BEST FOR PUBLIC OR PRIVATE EVENTS

3D design and printing (Adults) **\$790 per session (3 hours)**

10 participants

Learn 3D design and printing in a friendly group setting. With demonstrations from our facilitator, participants will learn how 3D printing works, and have the opportunity to create their own 3D model for printing.

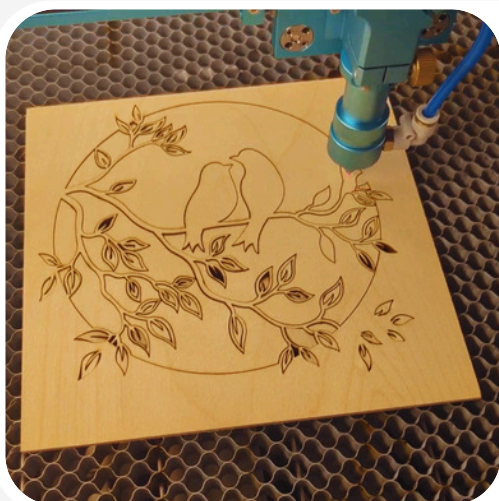

Materials are provided. Projector/screen are required

Introduction to laser cutting (kids) **\$670 per session (2 hours)**

10 participants, 10+

Learn about the materials, function and application of laser cutting in this kid-friendly workshop. With instruction and help from our facilitators, kids will get the chance to create their own item using laser technology. Parent/guardian must accompany any participant under 18.

Materials are provided. Projector/screen are required

Introduction to laser cutting (adults) **\$830 per session (3 hours)**

10 participants

Learn about the materials, function and application of laser cutting in this hands-on workshop. With demonstration and instruction from our facilitators, participants will learn how to use a laser cutter, and get the opportunity to create their very own item.

Materials are provided. Projector/screen are required

PUBLIC WORKSHOPS

BEST FOR PUBLIC OR PRIVATE EVENTS

Get to know your sewing machine **\$660 per session (2 hours)**

6 participants, age 14+

Bring in your own sewing machine and join this friendly group workshop. Our facilitators can help you track down manuals and parts for your machine, and show you how it all works. Participants will leave with new knowledge, and a sewing project of their own.

Materials are provided
BYO sewing machine and bobbin

Sew a Fish (kids) **\$570 per session (2 hours)**

Age 6+

Kids can learn sewing skills in this kid-friendly group activity. Scheduled as a ticketed event or drop-in session this workshop teaches kids how to cut fabric, sew a basic needle stitch and stuff their own plush toy.

Parent/guardian must accompany any participant under 18.

Materials are provided

BYO sewing project **\$660 per session (2 hours)**

6 participants, age 14+

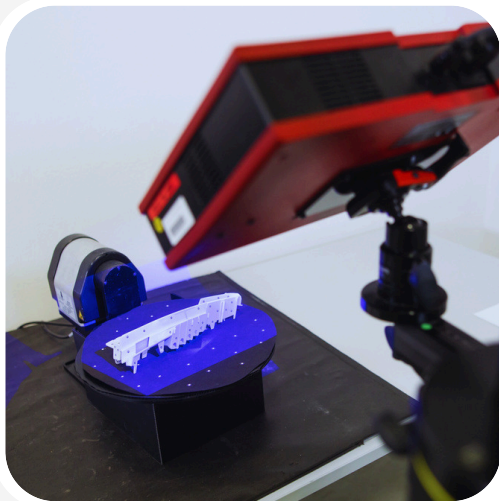

Have you got a sewing project gathering dust? In this BYO workshop participants can bring their own sewing project and get expert advice and help. Motivation is abundant in this friendly group workshop, and participants can learn new skills and techniques. Parent/guardian must accompany any participant under 18.

BYO sewing machine and bobbin

Parent/guardian help is encouraged for any participants under 18

3D scanning and replication

\$570 per session (2 hours)

6 participants, age 10+

Bring physical items into the digital realm with this 3D scanning workshop. Great for replicating items or digitally altering items, the facilitators will cover preparation of parts for 3D scanning, the scanning process, and editing files for export. Parent/guardian must accompany any participant under 18.

Projector/screen required

Silicone moulding and casting

\$680 per session (2 hours)

6 participants, age 16+

Silicone moulding is a great way of replicating an item multiple times. In this friendly group workshop our facilitators will be covering preparation of the item, creation of a one-part silicone block mould, and resin pouring of a replica.

Materials are provided
Wet area is preferred

Wet felting

\$730 per session (2 hours)

8 participants, age 10+

Learn one of the oldest techniques for textiles production in this friendly group workshop. With hands-on instruction from our facilitators, participants will learn the materials, preparation, and overall technique for creating a flat piece of felt fabric.

Materials and equipment are provided
Wet area with water access is required

Natural dyeing

\$650 per session (2 hours)

8 participants, age 10+

Skip the fashion store and get hands on with natural dyeing. Our facilitator will teach participants how fabric and textiles were traditionally dyed in the past. Have a go at dyeing your own fabrics with household items in a friendly group setting.

Materials and equipment are provided
Wet area with water access is required

“City of Mitcham has engaged Makerspace Adelaide for a series of exciting workshops including Repair Café, 3D printing, laser cutting and sewing at the Blackwood Community Centre. All workshops were engaging, inclusive and extremely well attended. The staff and volunteers are fantastic to work with, our Team would highly recommend their services.

Cassie Quinn – Community Facilitator (City of Mitcham)

“The learning workshops facilitated by Makerspace Adelaide are outstanding! The hands-on, interactive approach allows participants to engage deeply with practical skills while fostering creativity, critical thinking, and problem-solving. The facilitators are highly knowledgeable and supportive, ensuring that each participant thrives in a dynamic, inclusive, and inspiring environment.

Lina Russo – Head of Teaching & Learning (St Patrick's Technical College)
